The Introduction to Quran

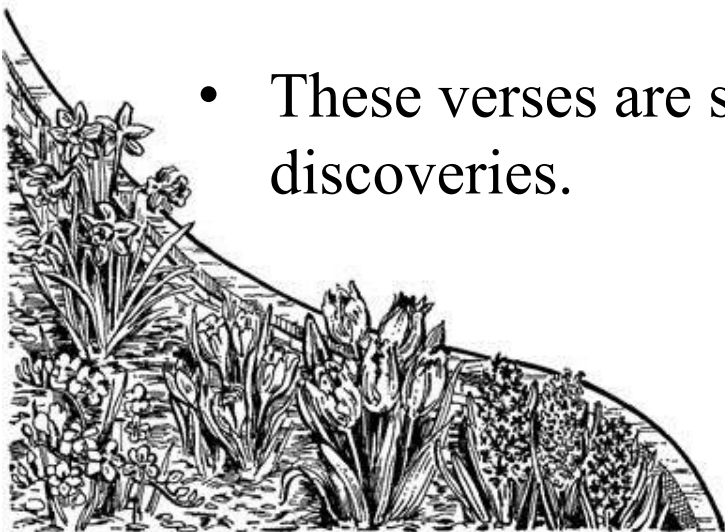

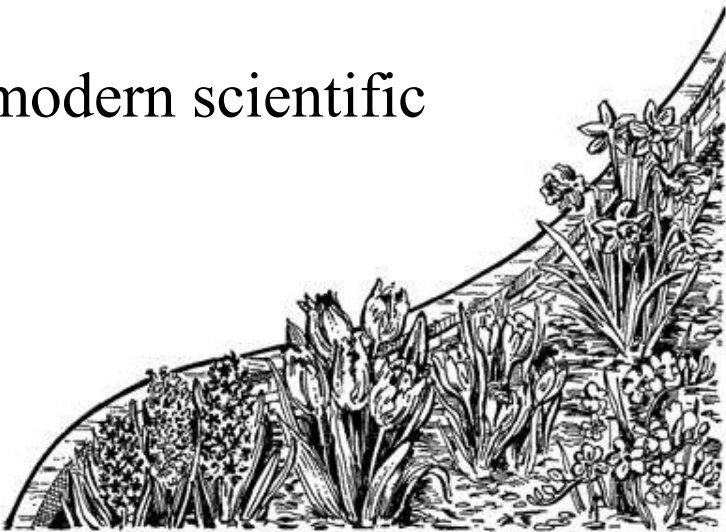

MLO 5.1.7

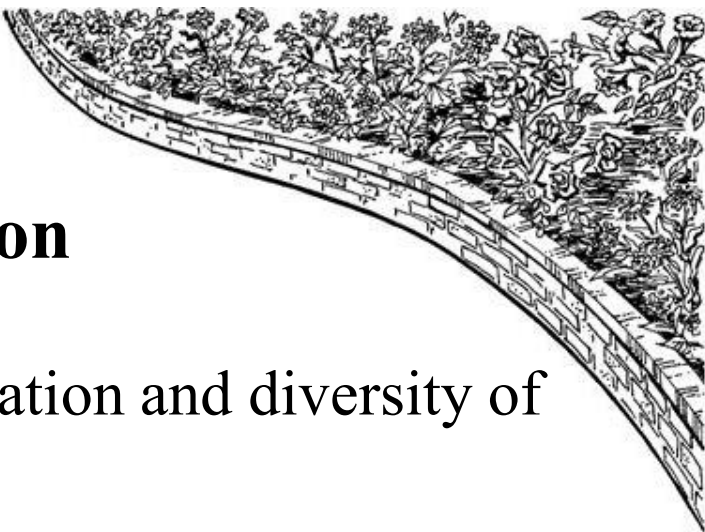

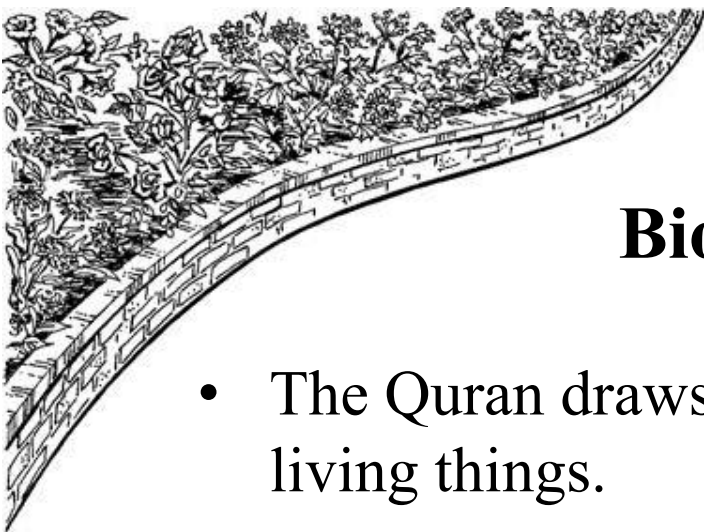

Explaining the alignment between Quranic verses and modern scientific discoveries across fields like embryology, cosmology, and biology.

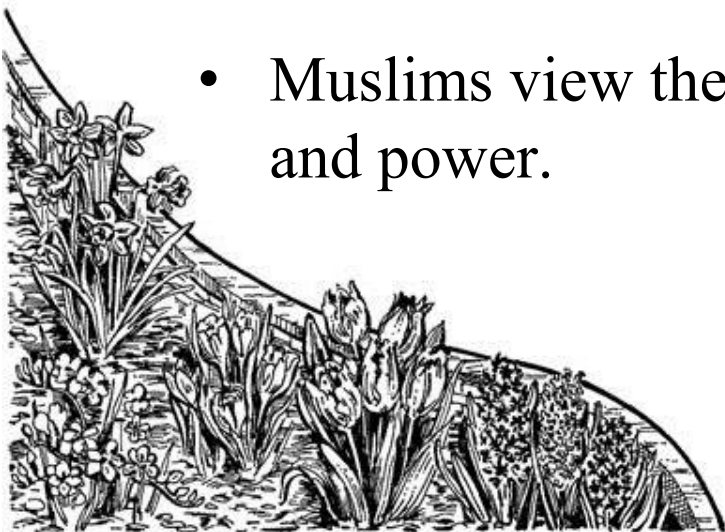

Quran and Scientific Discoveries

- The Quran contains verses about human development, the universe, and living things.
 - Embryology: Quran describes stages of human development in the womb.
 - Cosmology: Quran refers to the creation and expansion of the heavens.
 - These verses are studied alongside modern scientific discoveries.
- 
- 

Biology & Reflection

- The Quran draws attention to the creation and diversity of living things.
 - It encourages people to observe nature and reflect on creation.
 - Modern science provides detailed explanations of these natural processes.
 - Muslims view these signs as evidence of Allah's wisdom and power.
